

# VERITAS®

## VERITAS Anna - Creative sewing made easy

With its 32 stitch programs, the VERITAS Anna is one of the favourites among the mechanical sewing machines.

Versatile sewing operations such as appliqué, repair or decoration are absolutely no problem for this sewing machine - the powerful 70 watt motor also masters thick and multi-layer fabrics. But Anna also easily copes with elastic materials like jersey. It offers numerous utility and decorative stitches and sews cleanly, precisely and accurately. Buttonholes can be sewn quickly and easily thanks to the 1-step automatic buttonhole and the needle threader makes changing threads very easy.

### Perfectly equipped

The VERITAS Anna leaves nothing to be desired for all those who want to achieve high-quality sewing results. The powerful motor, the low-vibration housing and the reliable 6-point bottom feed dog enable precise, powerful work. Thanks to the integrated threading aid, the thread is threaded in seconds and the glare-free LED sewing light illuminates the optionally available large extension table perfectly.

### Creative and versatile

No matter whether decorations for sets or table cloths, smart hems on dresses, or appliqués - the VERITAS Anna is equipped for every project. With the 32 varied blind hem-, stretch-, satin-, and decorative stitch programmes, beautiful seams can be produced on elastic and solid, light and heavy materials, and the various overlock stitches are ideally suited to neatening seams and cutting edges.

### It only takes the press of a button

Nobody wants ruffles and tangled seams! For this reason, the thread tension on the VERITAS Anna can be set either automatically, or in several steps individually. Even perfect buttonholes are possible by simply pressing a button. The fully automatic buttonhole programme takes care of everything. Only the supplied button hole foot must be attached, and even that is done with just one movement.

## Specifications

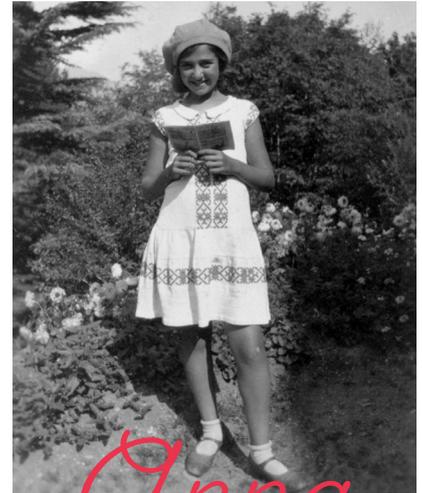

32 stitch programs	Thread cutter
1-Step automatic buttonhole function	Stitch length adjustable from 0 - 4 mm
Speed (R.P.M.): 750 +/-50	Stitch width adjustable from 0 - 5 mm

### Psychoanalysis for children

Anna Freud was an Austrian-British psychoanalyst. She was the youngest daughter of Sigmund Freud. She always worked very closely with her father and became his employee and confidant. Anna Freud studied with her father and concentrated mainly on children. She is considered the founder of child analysis and wrote well-known works. Stars like Marilyn Monroe were also treated by her.
