## VERITAS Romy

# LIMITLESS FINESSE

What budding fashion designer doesn't dream of holding his or her own show on the most major catwalks in the world? The VERITAS Romy features 34 stitch programs, lots of original decorative stitches and a powerful motor, suitable for processing all materials ranging from light to heavy. Packed in a beautiful but sturdy casing, this sewing machine will help you get closer to your dream.

### Easily adjustable

In order to ensure that every project is a success, everything on the VERITAS Romy can be adjusted to create the perfect seam on every material. You can quickly select stitch widths of up to 5 millimetres and stitch lengths of up to 4.5 millimetres with the two separate setting dials. The thread tension is easy and quick to adjust and you can sew seams on thick or multi-layer fabrics with the two-stage presser foot bar in no time at all.

### Elegant and powerful

The VERITAS Romy is perfect for assisting budding fashion designers because it can be operated intuitively. The dynamic and durable motor can pierce every material ranging from elegant blouses and shirts to robust jeans and corduroy trousers or jackets and coats, and runs nice and quietly thanks to the solid casing. This means that you can sew with a steady hand at any time, while the glare-free LED sewing light illuminates your work surface perfectly.

### All information at a glance

Our various stitch programs will get your creative juices flowing. In addition to the most important basic stitches, playful decorative stitches and practical overlock stitches ensure that there are some sophisticated eye-catchers. All stitch programs can be found on the fold-out summary card. Not only the card, but also two spool pins, can be folded out. It is possible to use a twin needle with these to produce particularly professional seams, such as the hem on a pair of jeans.

Her passion also inspired us - to create the VERITAS Romy.
